DETAILED ACTION

1. In view of amendment filed February 9, 2005, claims 5-6 have been cancelled. Claims 1-4, 7-19 are pending. Claims 11-19 are drawn to non-elected subjected matter. Claims 1-4, 7-10 are examined with merit.

2. In view of amendment filed February 9, 2005, the rejection of claims 1-5, 7-10 under 35 U.S.C. 102(b) as being anticipated by Birbaum et al. (US 5,760,111) is withdrawn.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1713

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claims 1-4, 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Birbaum et al. (US 5,760,111) in view of Ciba Literature on Tinuvin®1577 FF.

*The invention of claims 1-4, 7-10 relates to a **composition**, comprising:
at least about 5 wt% of a monovinylarene-conjugated diene copolymer;
from about 0.1 wt% to about 2.5 wt% of an ultraviolet (UV) absorber; and
from about 0.1 wt% to about 2.5 wt% of a light stabilizer; and wherein the UV
absorber further comprises 2-(2H-benzotriazol-2-yl)-4,6-ditertpentylphenol or 2-(4,6-
diphenyl-1,3,5-triazin-2-yl)-5-(hexyl)oxylphenol.*

Birbaum et al. (col. 9, line 49-64) teach polymeric composition comprising a monovinylarene-conjugated diene copolymers as the major ingredient of a composition. Therefore, applicants' claimed "at least about 5 wt%" of claim 1, "at least about 50 wt%" of claim 3, and "at least about 95 wt%" of claim 4, are inherently possessed in Birbaum et al. Further, Birbaum et al. (col. 12, line 14-25) teach that the polymeric composition to comprise from 0.01 to 5 wt% of two or more compounds of formula (1) (col. 1, line 13-39) which is a compound comprising a phenol group and a triazin group, and one or more further stabilizers which include the HALS (col. 15, line 27-28) as claimed in applicants' claim 8.

The difference between the invention of claims 1-4, 7-10 and Birbaum et al. is that Birbaum et al. are silent on the specific structures of 2-(2H-benzotriazol-2-yl)-4,6-ditertpentylphenol and 2-(4,6-diphenyl-1,3,5-triazin-2-yl)-5-(hexyl)oxylphenol.

Birbaum et al. (col. 1, line 13-39) clearly teach a structure that generically includes the structure as claimed. Therefore, motivated by the expectation of success of preparing a polymeric composition with improved photochemical and thermal stabilization (col. 1, line 1-12), it would be apparent to one of ordinary skill in art to appreciate the value of Tinuvin® 1577 FF after reading the disclosure to Birbaum. Therefore, in view of the reasons set forth, it would have been obvious to one of ordinary skill in art to use the generic structure teachings in Birbaum et al. and the literature teachings of Tinuvin® 1577 FF to obtain the invention of claims 1-4, 7-10.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1713

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
